CONNECTICUT HEALTHY CAMPUS INITIATIVE

A statewide collaborative of all college and university campuses in Connecticut, public, private, two- and four-year, committed to creating and sustaining healthy campus and community environments. Key focus areas include underage and high-risk drinking prevention, mental health promotion, suicide prevention, and opioid and stimulant education and awareness. We provide monthly professional development trainings on various topics during the academic year, grantee technical assistance, and host a listserv with prevention information, trainings, and funding opportunities. Funded by DMHAS.
